Summary
Bats is seeking a highly motivated full stack web software engineer with experience in responsive, dynamic website development.

Location: London, UK

Responsibilities
Our web applications play a critical role in the command, control and monitoring of the Bats Markets in Europe, in addition to presenting high-quality market data to our members and the investing public.

The individual will be working across the entire web stack, using agile software development techniques to build high-performance, scalable, data-driven web applications with Javascript, CSS, SQL and Python.

This person will also provide some operations support for Bats trading systems, including a rotating early shift and work closely with a US team to develop our global web applications.

Requirements
- Solid Python programming experience. Knowledge of Python based MVC web frameworks such as Django preferred
- Good understanding of modern web software architecture
- Familiarity with modern web standards, including HTML5, CSS3 and object oriented Javascript
- Experience with SQL (Postgres preferred)
- Experience with Linux or UNIX-like systems
- Experience developing and deploying high-performance, data-driven websites
- Experience writing automated unit tests used as part of a Continuous Integration suite. Experience with full-stack web testing is a plus
- Degree or equivalent in Computer Science or related field preferred

About Bats
Bats is Europe’s largest stock exchange by market share and value traded and is headquartered in London.

Bats offers trading in more than 5,000 of the most liquid equities across 25 indices and 15 major European markets, as well as ETFs, ETCs and international depositary receipts, through one connection. In addition, Bats Europe’s innovative smart order routing service allows cost-effective access to MTFs and to 13 primary exchanges.

The exchange launched its trade reporting service, BXTR, in November 2013. In its first month of operation BXTR became market leader.

Bats trading participants receive world-class support including sophisticated technical port services with real-time monitoring of latency, trading activity, network connectivity and risk management.

Bats is authorised as a Recognised Investment Exchange (RIE) and is regulated by the FCA.

Bats Europe is the brand name of Bats Trading Limited, a subsidiary of Bats Global Markets, a leading
Web Software Engineer

Job Description

operator of stock and options markets in the U.S. and Europe and the largest intraday stock exchange in the US on any given day.

**Associate Benefits**

Bats offers one of the most exciting places to work in London with an opportunity to take on the established exchange sector with leading edge technology.

We have a casual dress code and lunch is catered for every day at no cost to our employees. Our compensation programme, made up of salary and bonus, is highly competitive. In addition, the company offers a retirement plan with matching contributions, a group health plan, gym membership and life insurance.
